## Feature Story

### Phoenix Platinum Package

Advantech has added Phoenix Platinum temperature extreme testing and certification for selected embedded computing SBCs. At this stage, the PCA-6751Z2-F1B2 and PCM-3350Z2-G0A1 will be the first boards that offer the Platinum Phoenix testing. Below is a table that summarizes how Platinum Phoenix Testing fits into Advantech's current Phoenix Operation support.

## **Customization Service**

### **PPC Customization Service (II) : Removable HDD**

The latest addition to the list of customization service from PPC is the removable HDD. PPC usually come with a standard fixed HDD. But now, customers can request for a removable HDD. A removable HDD can be easily maintained and retrieved; simply unscrew and slide it out of the PPC.

Considered an OEM project, the delivery of this product will take extra time and cost. For further details, please contact your sales representative.

Here is a list of suggested PPCs that you can choose to modify for supporting the removable HDD by customization service:

PPC-L126, PPC-123, PPC-153, PPC-174 (Standard product has already supported removable HDD)

For customization service request, please email:
