Advantech and AMD cooperate on new Geode® GX2™ processor- based System On Module™ customer development platform

Advantech Co. Ltd., announced a joint development agreement with Advanced Micro Devices, Inc. to deliver an x86-based customer development platform featuring the AMD Geode GX2™ processor and Advantech's System on Module™ (SOM) development solutions. The compact, versatile customer development platform will allow customers to create products and applications targeted at embedded markets. Due to the flexibility of the solution, Advantech can offer embedded market customers cost effective targeted solutions by simply redesigning the base development platform.
